
0.1 Question 2d

(Written Response) If we were to drop businesses with postal code values equal to `missing_postal_code`, what **specific types of businesses** would we be excluding? In other words, is there a commonality among businesses with missing postal codes? **Please respond in no more than 2 sentences.**

Hint: You may want to identify and Google the names of the businesses with missing postal codes. Feel free to reuse parts of your code from 2c to re-examine `bus_missing` but we will not be grading your code.

Many businesses with missing values are businesses operating in the temporary address like “Off the Grid” such as mobile vendors or food trucks. Excluding them will bias the analysis against non-traditional food establishment.
